100 LPH to 5000 LPH

ماشین های تصفیه آب

High Quality Water
for Commercial, Industrial & Residential Applications

AquaSeema REVERSE OSMOSIS SYSTEMS

The AquaSeema Systems have been designed to consistently produce high quality water for the Commercial and Industrial applications. It can remove up to 99% of the total dissolved salts (TDS) from the raw feed water, producing high quality process water.

پیشکش کنندہ بہترین تکنالوجی جهان، تصفیہ آب منرال (RO)
صد فیصد آب را تصفیہ و صحی می سازد.

AquaSeema RO Suitable for:

- Drinking Water
- Whole building water loop
- Boiler feed water
- Cooling tower make up water
- Laboratory and analytical testing
- Laundry Service
- Horticulture/floriculture/green houses
- Voper/steam generators
- Ice making
- Dialysis machines
- Commercial Facilities
- Critical Applications

AquaSeema RO Uniqueness

- Water treatment process is based on a proprietary design optimizing membrane life and system performance
- Sub-assembly facilitates ease of service with membrane skid on swivel
- Pre-loaded with a microprocessor controller and other instruments for easy diagnosis, troubleshooting and services management
- Low and high pressure switches prevent damage during high pressure built-up and unavailability of raw water
- Each System is subjected to rigorous quality checks and hydro-testing before it is shipped

Quality Assurance

- Stringent quality checks at each stage
High quality components selection based on customized requirements
- Components conform to international certification
- ISO 9001-2009 certified manufacturing facility
Serial number control
